	The Grundfos MAGNA3 circulator pump is the ideal cho unrivalled energy efficiency, all-encompassing range and engineers and specifiers looking to create high-perform	nd built-in communicati	on capabilities, MAGNA3 is ideal for		
	The pump is maintenance-free due to the canned-rotor type design. This also means that pump and motor form an integral unit without shaft seal and with only two gaskets for sealing. The bearings are lubricated by the pumped liquid.				
	MAGNA3 features an intuitive display and allows you to connect wirelessly with the Grundfos GO Remote app, giving you access to advanced reporting and monitoring.				
	The pump includes fieldbus communication via CIM modules as well as analog and digital inputs and configurable relays.				
	Control features include AUTOADAPT and FLOWADA thus cutting costs on system components.				
	MAGNA3 is the superior choice for a wide range of heating and cooling applications, including:				
	Mixing loops Heating surfaces				
	Air conditioning surfaces				
	Ground-source heat pump systemsSmaller chiller applications.				
	MAGNA3 is a single-phase pump and characterised by control box. The pump also has a built-in differential-pro The pump housing is available in both cast-iron and sta	essure and temperature	e sensor.
